To achieve qualification, Heat Pump Systems must meet or exceed all the following efficiency requirements:

- **SEER: 15 or higher**
- **EER: 12.5 or higher**
- **HSPF: 8.5 or higher**

The Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 (also known as the Tax Relief Act of 2010) provides a personal tax credit to homeowners for the 2011 tax year for qualified residential energy property expenditures. The tax credit can be an amount equal to 10% of the amount paid but shall not exceed \$300 for the energy qualified property.

Lifetime limitation - The Tax Relief Act of 2010 reinstates the lifetime tax credit limits, which disqualify any homeowner who has claimed more than \$500 in 25c tax credits for all prior taxable years ending after December 31, 2005, from any further credits.

Note: As every taxpayer's situation is different, your contractor can help you figure out the actual tax credit.
