---

**General description of system**

The adaptor allows easy system expansion as long as restrictions are observed.

1. The entire system can be controlled on the Super Wiring System with each adaptor.
2. Up to 1024 units can be centrally controlled in 64 different groups.
3. Wiring restrictions (max. length: 3280 ft, total wiring length: 6560 ft, max. number of branches: 16) apply to each adaptor.

Maximum of 128 indoor units and 10 outdoor units can be connected in each group B and C.

Each group A, B, and C can have a maximum wiring length of 3280 ft, total wiring length of 6560 ft, and a maximum 16 branches.
