Thanks for your having purchased our product, Power Proportional Distribution Card. This operation manual contains notes for safe use of the product. 

For correct use, be sure to read this manual carefully before use. When you have read this manual, be sure to store it in a place where the operator can conveniently refer to at anytime.

In case of personnel change, be sure to give the manual to the new operator.

1. SAFETY CONSIDERATIONS

Please read these “SAFETY CONSIDERATIONS” carefully before installing air conditioning equipment and be sure to install it correctly.

After completing the installation, make sure that the unit operates properly during the start-up operation. Please instruct the customer on how to operate the unit and keep it maintained.

Also, inform customers that they should store this installation manual along with the operation manual for future reference. This air conditioner comes under the term “appliances not accessible to the general public”.

Meaning of danger, warning, caution and note symbols.

DANGER ........ Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

WARNING ........ Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

CAUTION .......... Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury. It may also be used to alert against unsafe practices.

NOTE .............. Indicates situation that may result in equipment or property-damage-only accidents.

Keep these warning sheets handy so that you can refer to them if needed.

Also, if this equipment is transferred to a new user, make sure to hand over this operation manual to the new user.

DANGER

• Any abnormalities in the operation of the air conditioner such as smoke or fire could result in severe injury or death. Turn off the power and contact your dealer immediately for instructions.

• Do not install the unit in an area where flammable materials are present due to risk of explosion resulting in serious injury or death.

• Safely dispose of the packing materials. Packing materials, such as nails and other metal or wooden parts, may cause stabs or other injuries. Tear apart and throw away plastic packaging bags so that children will not play with them. Children playing with plastic bags face the danger of death due to suffocation.

WARNING

• Ask your dealer for installation of the air conditioner. Incomplete installation performed by yourself may result in a water leakage, electric shock, and fire.

• Ask your dealer for improvement, repair, and maintenance. Incomplete improvement, repair, and maintenance may result in a water leakage, electric shock, and fire.

• Improper installation or attachment of equipment or accessories could result in electric shock, short-circuit, leaks, fire or other damage to the equipment. Be sure only to use accessories made by Daikin which are specifically designed for use with the equipment and have them installed by a professional.

• Ask your dealer to move and reinstall the air conditioner or the remote controller. Incomplete installation may result in a water leakage, electric shock, and fire.

• Never let the indoor unit or the remote controller get wet. It may cause an electric shock or a fire.

• Never use flammable spray such as hair spray, lacquer or paint near the unit. It may cause a fire.

• Do not allow children to play on or around the unit as they could be injured.

• Never replace a fuse with that of wrong ampere ratings or other wires when a fuse blows out. Use of wire or copper wire may cause the unit to break down or cause a fire.

• Never inspect or service the unit by yourself. Ask a qualified service person to perform this work.

• Cut off all electric waves before maintenance.

• Do not wash the air conditioner or the remote controller with excessive water. Electric shock or fire may result.

• Do not touch the switch with wet fingers. Touching a switch with wet fingers can cause electric shock.

• Never touch the internal parts of the controller. Do not remove the front panel because some parts inside are dangerous to touch. In addition, some parts may be damaged by touching. For checking and adjusting internal parts, contact your dealer.

• Check the unit stand for damage on a continuous basis, especially if it had been in use for a long time. If left in a damaged condition the unit may fall and cause injury.

• Placing a flower vase or other containers with water or other liquids on the unit could result in a water leakage, electric shock, and fire if a spill occurs.

CAUTION

• Avoid placing the controller in a spot splashed with water. Water coming inside the machine may cause an electric leak or may damage the internal electronic parts.

• Do not operate the air conditioner when using a room fumigation - type insecticide. Failure to observe could cause the chemicals to become deposited in the unit, which could endanger the health of those who are hypersensitive to chemicals.
• Do not turn off the power immediately after stopping operation. Always wait at least five minutes before turning off the power. Otherwise, water leakage and trouble may occur.
• The appliance is not intended for use by young children or infirm persons without supervision.
• The remote controller should be installed in such a way that children cannot play with it.

**NOTE**

• Never press the button of the remote controller with a hard, pointed object. The remote controller may be damaged.
• Never pull or twist the electric wire of the remote controller. It may cause the unit to malfunction.
• Do not place the controller exposed to direct sunlight. The LCD display may get discolored, failing to display the data.
• Do not wipe the controller operation panel with benzine, thinner, chemical dustcloth, etc. The panel may get discolored or the coating peeled off. If it is heavily dirty, soak a cloth in water-diluted neutral detergent, squeeze it well and wipe the panel clean. And wipe it with another dry cloth.
• Dismantling of the unit, treatment of the refrigerant, oil and eventual other parts, should be done in accordance with the relevant local and national regulations.

2. **FUNCTIONS AND OUTLINE**

Power Proportional Distribution Card, in combination with an existing intelligent Touch Controller, enables to proportionally calculate and display electricity amount used by air conditioner per indoor unit.

**[Main Functions]**

- Power proportional distribution results data can be saved for 12 months. (max. 12 months and 30 days)
- Per intelligent Touch Controller, power proportional distribution can be calculated for 64 indoor units at maximum.
- 3 Electric power meters at maximum can be connected to an intelligent Touch Controller.
- Power proportion distribution results data can be saved into a PCMCIA card. Data is saved CSV format generally applied to personal computers, so bills can be issued by use of a general purpose table calculation software package in easy manners. (A personal computer and a general purpose table calculation software package can be available separately.)
- The above functions of power proportional distribution are available to the optional website function software as well.
3. PREPARATION

3-1 Checking Attachments
Power Proportional Distribution Card includes the following attachments.

3-2 How to Connect
To distribute power proportionally, a test run must be performed for the main controller. Contact your dealer before use.

4. SIMPLIFIED CHART

5. INITIAL SETUP

5-1 Power Proportional Distribution Main Menu
Settings of power proportional distribution is made via the system setup menu. To display the system setup menu, press the S button at the bottom on the screen.

---

CAUTION
As for how to set current clock time, refer to the manual attached to intelligent Touch Controller.

NOTE
- Before initial setup, be sure to set the current clock time.
5-2 How to set Exclusion Periods (Normal Type)

This function is only for normal type, and exclusion periods where power proportional distribution calculation is not carried out and week days can be set. For example, it can be used when to collect fixed charges during day time in week days and carry out power proportional distribution calculation only for overtime work and holiday work. Time zone can be set per week day. By the way, this setup is of all systems, and it is impossible to make different settings in unit of zone.

Press Exclusion Periods (Normal Type).

1. How to set Begin Time

Press Begin button of the week day you want to set, and set the begin time in exclusion periods where power proportional distribution calculation is not carried out.

2. How to set End Time

Press End button of the week day you want to set, and set the end time in exclusion periods where power proportional distribution calculation is not carried out.

3. How to cancel time setting

When to cancel Exclusion Periods where power proportional distribution calculation is not carried out, press Disabled button.

4. When to end setup, press OK button.

5. When to cancel setup, press Cancel button. (Settings remain same as previous.)
5-3 Special Calculation Days (Normal Type)

Even in the case where Exclusion Periods (Normal Type) is set, it is available to set a day when power proportional distribution calculation is specially carried out all the day (0:00 - 24:00). Setting is made for one year in unit of day. For example, it is used when to carry out power proportional distribution for all the day in irregular holidays. You can make settings on a year basis, and the month and date that are set will be valid in the next year as well. If settings are made for February 29 of a leap year, the same setting will be effective on February 29 in the next leap year. This function has a setting range up to December 2037.

6. POWER PROPORTIONAL DISTRIBUTION REPORT OUTPUT PROCEDURES

Here are descriptions of procedures to output monthly Power Proportional Distribution Report.

--- CAUTION ---

Monthly Power Proportional Distribution data will not be collected unless initial setup has been carried out.

[Screen Display Procedures]

1. Insert Power Proportional Distribution Card into PCMCIA card slot of intelligent Touch Controller.

2. Press S button in the default screen of intelligent Touch Controller.

3. Select the Pwr Prp Dist in the System Setup menu, and press Execute button.

4. Press Result output button in the Pwr Prp Dist menu.

5. Select either period designation or month designation. In the case of period designation, enter calculation start day and calculation end day. In the case of month designation, designate the calculation day since calculation is made in unit of month.

6. Press Execute button.

7. Power Proportional Distribution Report is displayed on the screen.
7. HOW TO OUTPUT POWER PROPORTIONAL DISTRIBUTION REPORT

7-1 Display of Power Proportional Distribution Report

There are 2 methods to display Power Proportional Distribution Report, the method to designate a period and the one to designate a month.

- Case to Time Limit Setup
  In Time Limit Setup, the period for power proportional distribution calculation can be designated optionally. For example, it can be used when zone is changed in middle of a month and you want to see Power Proportional Distribution Report divided into the period before change and the period after change.

1. Select Time Limit Setup.
   Press the \( \text{portion}\) . When selected, the \( \text{portion}\) is displayed.

2. Designate the starting day of calculation period.
   Set the starting day of proportional distribution calculation.
   \( \text{The numeric keyboard appears, and set the starting day.}\)

3. Designate the ending day of calculation period.
   Set the ending day of proportional distribution calculation.
   \( \text{When Modify button is pressed, the numeric keyboard appears. Set the ending day.}\)

4. After setting period, press Execute button.

5. When to cancel setup, press Cancel button.
   (Settings remain same as previous.)

- Case to designate month
  In month designation, Power Proportional Distribution Report can be read in unit of one month. And by designating the calculation days, Power Proportional Distribution Report for a month from the designated calculation day of previous month to that of next month can be displayed.

1. Select Month.
   Press the \( \text{portion}\) . When selected, the \( \text{portion}\) is displayed.

2. Designate the Calculation Day.
   When Modify button is pressed, the numeric keyboard appears.
   Set the starting day of proportional distribution calculation.

3. After setting period, press Execute button.

4. When to cancel setup, press Cancel button.
   (Settings remain same as previous.)

Summary period is from 0:00 of the calculation day of one month before to 0:00 of that of this month.

Ex.) When the calculation day is set to “1” and the day of operating displays is 1 February, the power proportional distribution result of 1 to 31 January is summed up.

- Display of Power Proportional Distribution Report
  After selecting either Time Limit Setup or Month, when Execute button is pressed, the following screen appears.
In case the power proportional distribution report is missing, the display indicates the list of missing data (day / month / year / time). The list indicates up to a maximum of 100 cases. If the missing data exceed 100 cases, the list indicates only the first 100 cases. If OK button is pressed, the display indicates the power proportional distribution report.

**Display in unit of indoor unit**

1. When to display Power Proportional Distribution Report per indoor unit, select In/Unit. 
   - Press the □ portion.
   - When selected, it turns to ●.

2. When selected, the total of Power Proportional Distribution Report of all the indoor units is displayed.

**Display contents explanation**

- [Used Power] [Idling Power]

**[Cautions]**

Display of In/Unit Name

1:1-00 ~ 1:4-15 display indoor units connected to intelligent Touch Controller (DCS601C71).

**Display in unit of zone**

When Zone is selected, the total of Power Proportional Distribution Report of indoor units registered in zone is displayed.

1. When to display Power Proportional Distribution Report per zone, select the Zone.
   - Press the □ portion.
   - When selected, it turns to ●.

**Total sum display**

When All is selected, the total of Power Proportional Distribution Report of all the indoor units is displayed.

1. When to display the total of Power Proportional Distribution Report of all the indoor units, select All.
   - Press the □ portion.
   - When selected, it turns to ●.

**Insert the Power Proportional Distribution Card all the way into the insertion mouth on the left-hand side of the intelligent Touch Controller.**

Check that the Power Proportional Distribution Card is seated in the right direction as shown below.
7-2 Saving Files
Power Proportional Distribution Report can be saved. When to print out Power Proportional Distribution Report, when to display electric power amount in unit of tenant, and when to convert electric power amount into charges, edit these files in your general purpose spread sheet software.

[Cautions]
Display of In/Unit Name
1:1-00 – 1:4-15 display indoor units connected to intelligent Touch Controller (DCS601C71).

7-3 File Format
When Power Proportional Distribution Report is saved, a zone information file, an electric power information file and detailed information file are created.

1. Zone information file
This contains zone name and information of air conditioners in the zone.
1. File name : ZONE.CSV
2. File format:
   (Example)
   Zone ID, Zone Name Index
   0, " ' All"
   1, " ' Z-000"
   2, " ' Z-001"
   3, " ' Z-002"
   One line space
   zone ID, A/C Unit No Zone ID, air conditioner number
   0, 0
   0, 1
   1, 2
   1, 3

[Cautions]
Zone ID is automatically assigned. Do not change it.

2. Electric power information file
This file contains Power Proportional Distribution Report and information of air conditioners.
1. File name : YYYYMMDD_YYYYMMDD.CSV
   Month and date of calculation completion
   Year, month and date of calculation start
When the data from 25 Oct. 2000 to 24 Nov. 2000 are totalled, the results are indicated as "200001025_20001124.CSV". If the file of the same name already exists, it overwrites.

2. File format:

(Example)
Start Date, Nb of Days, A/C Type, Undistributed Power Amount, Period Type
A/C Unit No, In/Unit Name, HP Code, Daytime Used Pwr, Nighttime Used Pwr, Nighttime Idle Pwr, Gas Amount
0,"1:1-00", 38, 2459, 0, 0, 0, 0
1,"1:1-01", 38, 2718, 0, 0, 0, 0
2,"1:1-02", 38, 3105, 0, 0, 0, 0
3,"1:1-03", 38, 3494, 0, 0, 0, 0
4,"1:1-04", 38, 4141, 0, 0, 0, 0
60,"1:4-12", 70, 489, 0, 0, 0, 0
61,"1:4-13", 779, 0, 0, 0, 0
62,"1:4-14", 2d, 779, 0, 0, 0, 0
63,"1:4-15", 47, 1115, 0, 0, 0, 0

[Cautions]
Meaning of each data
Start Date : The starting day of sum
Nb of Days : Number of days of sum
A/C Type : 0 fixed
Undistributed Power Amount : 0 fixed
Period Type : Period designation system (0 : Period designation system, Date : Month designation system)
A/C Unit No : Number of indoor unit (0 ~ 63.)
In/Unit Name : Name of indoor unit
HP Code : Horsepower of indoor unit
Daytime Used Pwr : Power amount used
Nighttime Used Pwr : Not used
Daytime Idle Pwr : Electric power amount at stoppage (The amount is displayed, only when power proportional distribution calculation is not carried out at stoppage.)
Nighttime Idle Pwr : Not used
Gas Amount : Not used

3. Detailed information file

1. File name : HOURLY.CSV
   If the detailed information already exists, it will overwrite.
   Therefore, it is necessary to backup the data to a PC at every data output.

The data of the period designated by the power proportional distribution report (from 01:00 of the day the tabulation started to 0:00 of the next day the tabulation ended) are output. Regardless of whether the registration exists or not in the commissioning tool, the results of 64 (or 128) units of air conditioners are output.

2. File format:

(Example)
PPD Hourly Data (Wh)
Note : Date and Time mean the calculation time of PPD.
The value of 3:00 is a result between the calculation time just before 3:00 and 3:00.
Date, Time, 1:1-00, 1:1-01, 1:1-02, 1:1-03, ---, 1:4-15

Exclusion Periods (Normal Type) setup and Special Calculation Days (Normal Type) setup are not to be set when to carry out power proportional distribution of ice storage type. And setting is for only one pattern, and it is not available to make different setting per zone.
9. AFTER-SALES SERVICE

After-sales Service

- To have the product repaired, prepare the following information
  - Model
  - Date of installation
  - Circumstances - as detailed as possible
  - Address, name, phone number

- Transfer
  Transfer requires professional technique. Be sure to contact the supplier you purchased the product from or service station.
  The customer will be charged for the expense required for transfer work.

- Questions
  For after-sales service, contact the supplier you purchased the product from or the nearest service center.
